
MEMORANDUM

TO: HUMANITY
FROM: JOSHUA CERIBELLI
DATE: DECEMBER 31st 2018 – REVISED – 1.2.19
SUBJECT: STRANGE COINCIDENCES? – QUESTIONS – NEW YEAR’S RESOLUTION & RWR INTRO

BLUF – TLDR

The author lists some of the strange coincidences he mentioned in Memorandum #4.1. The author provides follow-up questions of analysis in regards to the ILG and some coincidences he’s encountered. The author purposes his New Year’s Resolution and introduction to the new show going forward.

BACKGROUND – PERSONAL STRANGE COINCIDENCES?

This particular document will be subject to change as we move forward through time. I must also pose the questions, do you believe everything happens for a reason, do you believe in magic, do you believe there are no coincidences, & do you believe history doesn’t repeat itself but it often rhymes?

Being this is the 8th post from the show, Words With Cherbs, I’d like to first give a shout out to the magic 8 ball I used to have in my backpack during the elementary and middle school days. Additionally, due to feedback I’ve already received from last week, I’ve heard that using the term ‘God’ does not strike the highest cord with some of my younger friends in reference to Memorandum #4.1[1]. Therefore, from here on out, I will instead refer to the aforementioned God(s) as the benevolent “curious local hyper-intelligent species” or as potential near-earth observers who have already have built an ‘inference device’, as scientifically proved by Dr. David Wolpert. Again, Dr. Wolpert notes that this ‘inference device’ would be a mechanism something along the lines of a scientist wielding a supercomputer great enough to predict future probabilities of events while influencing local events in a given universe [2]. If said near-earth observers have already built such a device, then their ability to affect the Earth to adjust the probabilities & circumstances around us probably shouldn’t be challenged. Additionally, I hope it could be agreed that such a near-earth species would most likely have the ability to manipulate light in a manner which is far more complex than our species’ understanding. With this statement in mind, I’d like to continue this memorandum #5.1 by diving into further detail around my personal life as briefly mentioned in Memorandum #4.1. What is to follow in this memorandum are only facts that I and others around me have witnessed, questions posed about these events & the ILG, and finally my New Year’s Resolution and introduction to the new show’s concept.

Pre Sep 11th, 2018

My name is Josh and my last name is Ceribelli. From the research that I’ve done, Cerebelli (which seems close enough to Ceribelli) is the genitive version of cerebellum [3]. It also means he who has brain, or intellect. Anyone who has seen the size of my head can hopefully agree that it is a bit above average in circumference. However, I hope it can be agreed that I am not the smartest person when it comes to many things in life and I’m still willing to learn more. Also, being that I was born in 1993 on August the 14th, this makes me a Leo by traditional zodiac signs and a rooster via the Chinese Zodiac Sign [4, 5]. Additionally, as a Leo, I would have an onyx gemstone in the eyes of some [6]. We are currently still in the year of the dog and Donald trump is a dog while also being the 45th president [7]. These horoscope signs have played particularly interesting roles within the past few years but I can explain some of those coincidences later.

Additionally, my younger brothers have had an enormous impact on my path in life. Therefore, I’d like to point out various experiences we’ve shared along the way that have especially affected my path more recently. Although I have fought much with my brothers, we are all extremely close and generally support each other in the actions we choose to take. However, I will admit that they have not agreed of my decision to drop my business and choose this recent path of pursuing Words with Cherbs. I am hoping that my continued actions in the quest towards the good will convince them otherwise. Although I love both of my brothers dearly, I’d consider my middle brother Adam the more orderly and serious brother while my youngest brother Gabriel to be a bit less serious and a bit more chaotic. Neither seems overly chaotic or overly orderly by a ‘normal’ measure though. Adam currently works in the real estate field as an intern and Gabriel currently is a student at University. Adam played college lacrosse and likes fishing and the outdoors while Gabriel prefers DJ’ing and is currently playing college basketball. Since 2017, both of my brothers visited me while I was living out in California at different times, individually. Coincidentally, we happened to get pictures in front of the Golden Gate Bridge in almost the same locations and I had a more disorderly hair style with the orderly brother and a more orderly hairstyle while with my disorderly brother.

Moving on to friends and Allentown. My first best friend also happened to be named Josh. While I don't believe we attended our main school together, I do remember playing neighborhood baseball regularly with him and my brothers. I also remember a bit of elementary school events from that time. Specifically, I remember hearing about the September 11th 2001 events as I was walking towards the black and yellow buses in the second grade. On the lighter side of events in Allentown, the first pop concert that I went to was by Eiffel 65. In that show they played 8 songs and the gig lasted 42-minutes while performing their hit Blue (Da Ba Dee) twice [8]. My love for games also started early, I got my first Xbox in the eighth grade in 2008 where my gamer tag was Cherbs08. Some of my favorite games have been Fallout3, Skyrim, XCOM: Enemy Unknown, & Portal, among others. As an outdoorsmen, I've always cherished fishing and have been to Jackson Hole Wyoming twice. An Eagles fan since birth, I just recently attended 2 Eagles games, one against the Redskins with my brother Adam and the other against the Texans with my both of my brothers and Father, they won both. My business name was Bastone Products LLC, standing for walking stick in Italian. I played bass guitar back in the day. My guitar cord happened to be pink that connected to the black and white amp. I snowboard as well and my board has pink and black tiger stripes. I was a radio DJ at the University of Maryland, College Park and went by the name Ruby2'sDay. I did this because Tuesday mornings at 8am was one slot I liked open at the time and I wanted to link the two worlds of dance (old & new) by playing songs there were 'gems' or 'rubies'. Finally, I enjoyed playing football at Calvert Hall and wore the number 34. My position was fullback, outside linebacker, & wedge buster on kickoff.

Post Sep 11th, 2018

This section for now is a bit less scattered but I can certainly put more pieces together going forward after I receive inquiries into the statement I make about the addition to my New Years Resolution. As noted for most, the date of Sep 11th has huge significance for many people of all religions specifically including Judaism [9]. I've also talked to a Catholic Priest about the current spiritual path I am taking on 12.18.18 however I did not agree with the advice that said priest gave me. While I'll admit to being an alter server when younger, I have never been a huge 'church goer', although after returning to Baltimore on Sep 30th, I believe I attended the local Baltimore church 3 times where the homilies and messages I received in the church were a bit different than what one may envision when they think of a 'normal' church homily may include. Some of the homilies from the priest included topics like Dark Energy & Matter and speeches about Carl Sagan. However, I didn't agree with everything that the priest said.

While searching through old family pictures on 12.15.18 in my storage area located through my closet in my room in Baltimore County MD, I encountered a few interesting pictures. Several were of me as a baby dressed in my favorite colors, mostly blue but a little green here and there too. I also encountered a poem, I believe this was after I had decided on the name for the subject title for Memorandum #4.1. The poem was titled "A Mother is God's Gift". It goes: A mother is a wondrous gift, the bright and shining light, that god gave every one of us to teach us wrong from right. A mother is the gentle touch, the word, the smiling face, and all the things that make a home a cheerful happy place. A mother is the sacrifice, the sympathy, and care that makes each joy seem brighter still and pain less hard to bear. A mother is the someone dear who's cherished all year through a mother is a wondrous gift especially if she's you.

I also recently had a dream about a park near Hopkins University and woke up to re-discover said park and also 'the miracle on 34th street' [10].

Finally, my mother planned a surprise family trip up to New York City for our family gift during the dates of the 27th to the 28th of December. For the trip, she scheduled my brother Gabriel and I to see the Avicii true stories documentary, but Gabe, Adam, Adam's current girlfriend and I all ended up going and I left the theater early. My mother also scheduled a magic show that included an encore while my father scheduled a tour of the Woolworth building. Apparently there was a flash of blue light due to "a transformer explosion" in the city on the night of the 27th [11]. Luckily no one was injured [11].

ANALYSIS – FOLLOW-UP QUESTIONS

Credentials

Do you have any questions about the ILG thus far? If so, what seems particularly confusing about the ILG and any of the coincidences I've encountered in my own life? Are the events I listed just coincidences or not coincidences at all?

Love & Luck

What would you consider luck? Would you consider me as lucky? Do you believe in Luck? Was my Ruby 2'sDay college DJ moniker just due to chance? Do you believe the concept of Ruby 2'sDay came from a source of Love? Do you believe in Love?

Metaphysics

What could hitting the ‘quitting bell’ mean? In reference to the ILG, what could an afterlife mean? Are you a religious person? Would you consider ‘science’ a form of religion? How religious must you be in order to be considered ‘religious’? Should I continue to go to church? Why does religion carry so much weight going forward as a survival and evolutionary mechanism? Do you believe in Santa Claus?

Artistic Interpretation

Would you consider ‘art’ to be a reflection of society? Would you also consider ‘art’ to be a force that can foreshadow events? Do you believe poetry is ‘art’? Do you think WWC was ‘art’? Do you think I was trying to predict the future? If I broke down WWC, would your interpretation of it at a given moment change over time? Are there other art forms that represent this ‘inference’ type of device? Would you consider music ‘art’? Have you ever been listening to the radio and your favorite song comes on at just the right moment?

Artificial Intelligence & the Universe

Should I try and seek more information about A.I.? Was I completely off base in my memorandum #4’s understanding of A.I.? How should I go about reaching out to get to ‘higher level’ leaders who may have more information about A.I.? Would these ‘higher level’ leaders be willing to speak to someone like me, in the first place? Does my understanding of the cosmos seem accurate to you and scientists more generally?

SUGGESTIONS – MY NEW YEARS RESOLUTION & ROOST WITH RUBY (RWR) INTRO

As predicted, most earthly business has seemed to be running normally since publishing the last memo. My New Year’s Resolution is to grow this next show to as large of a network as we possibly can and to be more open with you folks. Specifically, due to various coincidences and events that have transpired, I believe I am most likely the biblical ‘Son of Man’ or ‘Rick’ from Rick & Morty, or ‘Man with no Name’ of this world. But again, I have come in peace and will remain peaceful. I know this will be shocking to most and for that I apologize up front. But I will put more puzzle pieces together & explain more via our new show and I’m letting you all know about this as an addition to my New Year’s resolution. I will continue to publish content every Tuesday morning going forward via the new show, Roost with Ruby, until our species finally ‘roosts’ and seeks global peace. I know this is going to be extremely difficult to achieve but I believe we can collectively ‘win’ and convince our God(s) or benevolent “curious local hyper-intelligent species” to bring such an inference device to help us solve the problems we are still battling. Also, there should be one more memo to be posted on Wordswithcherbs.com next Tuesday that will be a brief overview of some of the guidelines I recommend to follow in order to play the earthly version of the ILG in the best manner I’ve learned. But please understand these will be just my opinion and I’m not trying to force anyone to do anything they don’t want to do.

1. *The Good.* I have many more coincidences and anecdotes that I can speak with you about. By the ILG, I can teach anyone to recognize how to interpret strange coincidences in your own lives and their potential significance. I can continue to teach & develop the ILG until the theory is falsified and I am also more than willing to continue to hear feedback about potential holes that the theory contains and anything else included in my show(s).

2. *The Bad.* I can imagine that many people may say that, “I’m thinking too hard about life or looking too deep into things” in response to this theory, paper, &/or New Year’s Resolution. I want to reemphasize that my interests drove me towards this direction in life and I’ve found it to be a continually challenging but enlightening experience. I also apologize for that this memo is likely not going to be as polished as my previous memo. But I can come back to polish it up with revised versions of more coincidences and personal anecdotes, if needed.

3. *The Ugly.* The show must go on, therefore, I’ll continue to discuss these ideas via our new platform. Additionally, I have decided to give my mother my old business for free. Some may ask, “Why wouldn’t you at least stay partially invested in your business?” I would answer that my business has inherent conflicts of interest with my message that I would like to continue pursuing. I may have to take a job in the meanwhile to compromise with my parents / pay some debts that I feel morally obligated to meet but I hope I can get some help via other means to settle those debts. If I do end up taking a job, it would probably be as a mechanic (or something to do off the computer) but I’m hoping to only focus on RWR going forward since I believe it is now critical to do so. Again, I don’t want to pursue money and while I recognize its utility, I’d rather share with others and I believe I can achieve this through peaceful means. Collectively, everyone who has joined this journey thus far I believe is on the ground floor of a very powerful movement for good of all and I only wish blessed fortune upon those who continue the journey. I personally ask for your continued support ahead but I understand if you may be a bit concerned going forward. I promise to continue to fight for good, and I believe in every one of us. Godbless you all.
